PROFESSIONAL SUMMARY

Full Stack Developer with 3.5+ years of experience turning business problems into fast, reliable web applications. I work across the stack with Angular (15–18), TypeScript, RxJS, Node.js, Express.js, GraphQL, and PostgreSQL. Delivered 8 core modules for an enterprise School Management System used by a Singapore-based client and for a high-traffic e-commerce platform. Hands-on with Stripe and Razorpay payments, role-based access control, AWS S3 file handling, WhatsApp and email automation, and catalog migrations from Shopify, WooCommerce, and BigCommerce. Known for owning features end to end, from database design and secure APIs to clean, responsive interfaces.

SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend: Angular 15–18, RxJS, Angular Signals, Angular Material, PrimeNG, Tailwind CSS, Bootstrap, Lazy Loading, Responsive and Multilingual UI

Backend and APIs: Node.js, Express.js, REST APIs, GraphQL, Event-Driven Architecture, RabbitMQ, Redis, Socket.io, JWT Authentication, RBAC, Swagger/OpenAPI

Databases: PostgreSQL, MySQL, Sequelize ORM, Query Optimization, Indexing

Cloud and Integrations: AWS S3, AWS Lambda, AWS EventBridge, Firebase, Stripe, Razorpay, Twilio, SendGrid, WhatsApp API, Facebook Lead Ads

Testing and Tools: Jest, Unit Testing, Git, GitHub, Agile/Scrum, SDLC, Code Reviews

WORK EXPERIENCE

Software Engineer — Openwave Computing Services Pvt LtdJul 2025 – Present

Client: MindChamps, Singapore | Chennai, India

- Contributed to a 6-module enterprise School Management System (Lead Management, Enrollment, Portfolio, Finance, Events, Project Management), building responsive Angular interfaces and Node.js/Express APIs.
- Built the Enrollment module full stack (Angular forms, Node.js/Express APIs, PostgreSQL) covering onboarding, attendance, invoice drafting, royalty calculation, and refunds, replacing manual spreadsheet processes with a digital workflow.
- Delivered the Portfolio module end to end with 6 features (Child Progress, Moments, Announcements, Documents, Messaging, Surveys) using Angular reactive forms and REST APIs, centralizing student progress tracking and improving parent engagement through the mobile app.
- Launched the Lead Management module integrating Facebook Lead Ads, WhatsApp notifications, and SendGrid email automation, improving enquiry tracking and conversion visibility.
- Integrated Stripe across the Angular checkout and Node.js backend, implementing webhook handling and payment-status synchronization with PostgreSQL for accurate invoice settlement.
- Secured access for user roles by implementing RBAC with Angular route guards, permission-based UI rendering, and API-level authorization.
- Improved navigation performance and maintainability by applying Angular lazy loading with modular feature routing and structuring the Node.js backend into routes, controllers, services, and data layers.
- Designed PostgreSQL schemas with foreign keys, integrity constraints, and strategic indexes, and tuned SQL queries to support reporting, dashboards, and transactional operations.
- Engineered secure media and document handling using Angular upload components, Node.js services, and Amazon S3; standardized validation, exception handling, logging, and API responses for reliability.

Software Engineer — ZenBasket, Centizen Inc.Feb 2023 – Jun 2025

Tirunelveli, India

- Owned 5 core modules (Product Catalog, Checkout, Plugins, Specifications, Badges) of a high-traffic e-commerce platform, creating reusable Angular components and Node.js/Express REST and GraphQL APIs.
- Streamlined merchant onboarding with catalog migration workflows (Angular UI and Node.js services) that import, transform, validate, and sync products from 3 platforms: Shopify, WooCommerce, and BigCommerce.
- Enabled international sales by integrating Razorpay and Stripe with multi-currency payments, webhook handling, and payment reconciliation, and by delivering a multilingual Angular UI with backend locale support.
- Enforced secure access for 3 roles (admin, merchant, customer) through full-stack RBAC using Angular guards, permission-based rendering, and backend access controls.
- Scaled storage of product images, invoices, and merchant documents by building upload workflows with an image compression and optimization pipeline on Amazon S3.
- Reduced production regressions by authoring Swagger/OpenAPI documentation and writing Jest unit tests for backend services.
- Resolved critical production issues across frontend, APIs, database workflows, and third-party integrations, restoring platform stability while collaborating with UI/UX, QA, and Product teams in Agile sprints.

PROJECTS

Kabaddi Tournament Management Application — Node.js, PostgreSQL, Angular 18

- Developed a full-stack platform with team registration, admin approval workflows, automated fixture generation, and real-time score management to streamline tournament operations.
- Architected REST APIs for team onboarding, player records, and match scheduling with transactional data consistency; added WhatsApp live-score alerts and role-based access for 2 roles (Admin, Team).

EDUCATION

B.E., Computer Science and Engineering — Einstein College of Engineering, Tirunelveli 2019 – 2023

AWARDS AND ACHIEVEMENTS

- Innovation Mastermind Award, ZenBasket, Centizen Inc.
- Rising Star Award, ZenBasket, Centizen Inc.
